Preface

This book presents recent experimental and theoretical advances in fluid dynamics in physics and engineering. It begins with invited lectures given during the International Enzo Levi Spring School 2011 held at *San Nicolas de Hidalgo Michoacán University* in Morelia, May 5-6, 2011, and invited seminars presented in the XVII National Congress of the Fluid Dynamics Division of the Mexican Physical Society, held in Guadalajara, Jalisco, Mexico, November 8-11, 2011.

The Spring School is organized every year in honour of Prof. Enzo Levi, a well known Mexican scientist that dedicated his research to the study of fluids. He was one of the founders of the Instituto de Ingeniería (Engineering Institute) of the Universidad Nacional Autónoma de México (UNAM), and of the Instituto Mexicano de Tecnología del Agua (Mexican Institute for Water Technology) of the National Water Commission. He was the mentor of several generations of Mexican Engineers.

During the two day school, lectures were given by well known national and international scientists. In 2011, many people attended the meeting with fifty researchers and more than a hundred graduate and undergraduate students. A wide variety of topics were presented by young national researchers that included geological structures, astrophysics, oceanography, SPH, multiphase flow and complex fluids. Moreover, two American and one European very well known researchers presented important aspects of fluid dynamics: instabilities that develop in rotating flows, presented by Patrice Le Gal, from Aix-Marseille University, France,

a kind of solitary waves, presented by Patrick Weidman, from the University of Colorado, and spatiotemporal complexity by Michael Schatz, from Georgia Institute of Technology.

The Annual Fluid Dynamics Congress has a different format. In 2011 it lasted four days and was mainly constituted by short oral presentations of students and researchers. There is also a Gallery of Fluid Motion where posters exposing fluid motion photographs of special beauty are presented. The first three papers in the Gallery of Fluids correspond to the first three prizes given during the Congress. Moreover, eight invited speakers presented works related to different themes belonging to fluid dynamics. As for international well-known invited speakers, Herman J.H. Clercx, from Eindhoven University of Technology, presented a seminar about the formation of coherent structures in 3D laminar flows; Christophe Eloy, from Aix-Marseille University, France, spoke about the hydrodynamical constraints on the shape of fishes; José Rafael Castrejon Pita, from the University of Cambridge, England talked about drop formation and the consequent problems in the printing industry; Leonardo Trujillo, from the Physics Center, IVIC, Venezuela, showed how granular media can be described from a theoretical hydrodynamical point of view, and Jorge Arreola came from San Luis Potosí, Mexico, to speak about ions transports in biological membranes. Three local speakers presented the main research areas developed in Guadalajara University: astrophysics with Silvana Navarro, who showed how symbiotic stars can eject matter via jets, oceanography with Guillermo Gutiérrez, and rheology with Armando Soltero.

The short oral presentations are organized by themes: Geophysics, Porous Media, Microfluidics, Astrophysics, Multiphase Flow, Heat Transfer, Rheology, Magnetohydrodynamics, Hydraulics, Fluid-Structure Interaction, Granular Flow and Viscous Flow.

The book is aimed to fourth-year undergraduate and graduate students, and to scientists in the field of physics, engineering and chemistry that have interest in fluid dynamics from the experimental and theoretical

point of view. The material includes recent advances in experimental and theoretical fluid dynamics and is adequate for both teaching and research. The invited lectures are introductory and avoid the use of complicated mathematics. The other selected contributions are also adequate to fourth year undergraduate and graduate students.

The editors are very grateful to the Institutions who made possible the realization of the International Enzo Levi Spring School and the XVII National Congress of the Fluid Dynamics Division of the Mexican Physical Society, especially the Consejo Nacional de Ciencia y Tecnología (CONACYT), the Consejo Mexiquense de Ciencia y Tecnología (COMECYT), the *Sociedad Mexicana de Física*, the *San Nicolas de Hidalgo Michoacan University*, the Mexican *Secretaria de Relaciones Exteriores*, Guadalajara University, Metropolitan Autonomous University-Azcapotzalco, UNAM, IPN, Cinvestav-Abacus, DEFSa and Cambridge University, England.

We acknowledge the help of the Edition Committee: Salvador Galindo Uribarri, Estela Mayoral Villa, Elizabeth Teresita Romero Gúzman, Eduardo de la Cruz Sánchez, Roberto Zenit, Marcos José Solache Ríos, Edmundo del Valle Gallegos, Abel López Villa, René Vargas, Galileo Domínguez and in particular Cynthia Centeno Reyes and Roberto González Galan for their important and valuable contribution to the final manuscript.

Contents

Part I Invited Lectures

Applied fluid mechanics in the environment, technology and health	3
Jaime Klapp, Leonardo Di G. Sigalotti, Leonardo Trujillo and Catalina Stern.	
Waves and Instabilities in Rotating and Stratified flows	25
Patrice Le Gal	
The Sloshing-Induced Motion of Free Containers.....	43
Patrick D. Weidman and Andrzej Herczynski	
Experimental investigation of the North Brazil Current Rings during their interaction with the Lesser Antilles	63
Raúl C. Cruz Gómez	
Physical Processes of Interstellar Turbulence	79
Enrique Vázquez Semadeni	
Assessing significant phenomena in 1D linear perturbation multiphase flows	99
Alberto Soria López and E. Salinas-Rodríguez	
Critical and Granular Casimir Forces; a Methodological Convergence from Nano to Macroscopic Scales.....	115
Nahmad-Molinari, Y., Rodríguez-Liñán, G. M., Reyes-Tendilla, J. F. and Pérez-Ángel, G.	
High speed shadowgraphy for the study of liquid drops.....	127
José Rafael Castrejón-Pita, Rafael Castrejón-García, Ian Hutchings	
Formation of coherent structures in a class of realistic 3D unsteady flows..	147
Michel F.M. Speetjens and Herman J.H. Clercx	
Jets in symbiotic stars: the R Aqr case	167
Silvana G. Navarro Jiménez and Luis J. Corral	
Granular hydrodynamics	177
Leonardo Trujillo, Leonardo Di G. Sigalotti and Jaime Klapp	

Efficient Neighborhood Search in SPH	193
Juan Pablo Cruz Pérez and José Antonio González Cervera	

Part II Multiphase and Granular Flow

On the film thickness between a bubble and the wall in liquids in vertical tubes.....	209
Abel López-Villa and Abraham Medina Ovando	

Mathematical model for “Bubble Gas-Stratified Oil” flow in horizontal pipes.....	215
Cynthia Centeno-Reyes and Octavio Cazarez-Candia	

Pseudoturbulence in bubbly and transition flow regimes.....	225
Santos Mendez-Diaz, Roberto Zenit Camacho, Sergio Chiva Vicent, José Luis Muñoz-Cobo González, Arturo Morales Fuentes	

Single- and Two-phase Flow Models for Concentric Casing Underbalanced Drilling	235
Jorge Omar Flores León, Octavio Cazarez Candia and Rubén Nicolás López	

Study of structural properties in complex fluids by addition of surfactants using DPD simulation.....	243
Estela Mayoral Villa, Eduardo Nahmad-Achar, Jose Manuel Martínez-Magadán, Alejandro Ortega and Ismael Soto Escalante	

Study of slug flow in horizontal, inclined, and vertical pipes	249
Omar Christian Benítez Centeno and Octavio Cazarez Candia	

Modeling of water-steam slug flow in inclined pipes undergoing a heating process	257
P. Mendoza-Maya, O. Cazarez-Candia and S.L. Moya-Acosta	

Crystal-Liquid transition in binary mixtures of charged colloidal particles	265
Catalina Haro-Pérez, Gualberto Ojeda-Mendoza, Carlos. A. Vargas, Eduardo Basurto-Urbe and Luis. F. Rojas-Ochoa	

On the mass flow rate of granular material in silos with lateral exit holes ..	273
Abraham Medina, G. Juliana Gutiérrez-Paredes, Satyan Chowdary, Anoop Kumar and K. Kesava Rao	

Traction force due to aqueous foam flow rising in a vertical pipe 279
 A. Pérez-Terrazo, V.S. Álvarez-Salazar, I. Carvajal Mariscal, F. Sánchez Silva,
 A. Medina

**A discrete model for simulating gas displacement in fractured porous
 media 287**
 Socrates Pérez Morales, Andrés Méndez Ancona, Manuel Ortega Rocha, Ricardo
 Islas Juárez, Raquel Herrera Solis and Galileo Domínguez Zacarías

**Profile deformation of a non cohesive granular material in an
 accelerated box 295**
 S. Álvarez-Salazar, A. Pérez-Terrazo, A. Medina, C. A. Vargas

Part III Convection, Diffusion and Vortex Dynamics

Experimental and computational modeling of Venlo type greenhouse 309
 Abraham Rojano, Raquel Salazar, Jorge Flores, Irineo López, Uwe Schmidt and
 Abraham Medina

Numerical simulation of an open cavity with heating in the bottom..... 317
 Guillermo Efen Ovando Chacon, Sandy Luz Ovando Chacon and Juan Carlos
 Prince Avelino, Esli Vázquez Nava, José A. Ortíz-Martínez

**Natural convection and entropy generation in a large aspect ratio cavity with
 walls of finite thickness 325**
 Daniel Pastrana, Juan Carlos Cajas and César Treviño

**Spectral analysis of chaos transition in a dynamic system. Application to
 backward facing step flow in mixed convection..... 337**
 Héctor Barrios Piña, Stéphane Viazzo, Claude Rey and Hermilo Ramírez León

Turbulence model validation in vegetated flows..... 345
 Ricardo González López , Hermilo Ramírez León, Héctor Barrios Piña and
 Clemente Rodríguez Cuevas

CFD on graphic cards 353
 C. Málaga, J. Becerra, C. Echeverría and F. Mandujano

Vortex in the wakes of airplane..... 359
 David Flores García, Tiburcio Fernández Roque and Jorge Hernández Tamayo

The activity of La Bufadora, a natural marine spout in northwestern Mexico	365
Oscar Velasco Fuentes	

A CNC machine for stationary drop deposition and coalescence in liquid-liquid systems	373
Franklin Peña Polo, Leonardo Trujillo, Jaime Klapp and Leonardo Di G. Sigalotti	

Part IV Meteorology and Pollution

Numerical Study of Wind Field Adjustment with Radial Basis Functions ..	383
Rafael Reséndiz, L. Héctor Juárez, Pedro González-Casanova, Daniel A. Cervantes and Christian Gout	

Dispersion of air pollutants in the Guadalajara Metropolitan Zone	391
Hermes Ulises Ramírez Sánchez and Mario Enrique García Guadalupe	

Modeling of Funnel and Gate Systems for Remediation of Contaminated Sediment.....	399
Fei Yan and Danny D. Reible	

Analysis of transport parameters for a Cr(VI) contaminated aquifer in México	409
Lázaro Raymundo Reyes-Gutiérrez, Ramiro Rodríguez-Castillo, Elizabeth Teresita Romero-Guzmán and José Alfredo Ramos-Leal	

Numerical Simulation of Dispersion and Sorption of Se(IV) through Packed Columns with non-living Biomass: Experimental and Numerical Results...	423
Carlos E. Alvarado-Rodríguez, Jaime Klapp-Escribano, Elizabeth T. Romero-Guzmán, Zayre I. Gonzalez-Acevedo and Ricardo Duarte- Perez	

Tridimensional analysis of migration of ²²⁶Ra through a saturated porous media	433
Nora Isabel Pérez Quezadas, Estela Mayoral Villa, Jaime Klapp Escribano, Eduardo de la Cruz Sánchez and Roberto González Galán	

Evaluation of a temporary repository of radioactive waste.....	441
Roberto González Galán. Eduardo de la Cruz Sánchez, Jaime Klapp Escribano, Estela Mayoral Villa, Nora Pérez-Quezadas and Salvador Galindo Uribarri	

Part V General Fluid Dynamics

Friction coefficient in plastic pipelines 451
E. A. Padilla, O. Begovich and A. Pizano-Moreno

Super Free Fall in Concentric Pipes 457
C. Treviño, S. Peralta, Carlos A. Vargas, A. Medina

Super accelerated flow in diverging conical pipes 467
A. Torres, F.J. Higuera and A. Medina

Analysis of the Blasius' formula and the Navier-Stokes fractional equation 477
José Roberto Mercado Escalante, Pedro Guido Aldana, Jorge Sánchez-Sesma,
Mauro Íñiguez Covarrubias and Arturo González Casillas

**Relativistic Hydrodynamics and dynamics of accretion disks around black
holes 483**
Juan Carlos Degollado Daza and Claudia Moreno González

Low-Re μ UAV Rotor Design 489
Oscar Rubio, Fidel Gutiérrez, Juan Carlos Zuñiga and Marcelo Funes-Gallanzi

Oscillation characteristics of a vertical soft pipe conveying air flow 501
Héctor Manuel De La Rosa Zambrano and Anne Cros

Capillary rise in a convergent Hele-Shaw cell..... 507
C. A. Vargas, A. Medina, F. Aragón

Manufacturing of polymeric microlenses by drip injection..... 513
M. A. Ortega P., A. López V. and G. J. Gutiérrez P.

Part VI: Gallery of Fluids

Visualization of Flow inside a Ranque-Hilsch tube 523
David Porta Zepeda, Carlos Echeverría Arjonilla, Catalina Elizabeth Stern
Forgach, Marcos Ley Koo.

Splashing of Solid Spheres impinging in Various Fluids 525
Sergio Valente Gutierrez Quijada, Martha Yadira Salazar Romero, Catalina
Elizabeth Stern Forgach.

Bubbles in Isotropic Homogeneous Turbulence	527
Ernesto Mancilla, Roberto Zenit, Gabriel Ascanio, Enrique Soto.	
CFD on graphic cards	529
C. Malaga, J. Becerra, C. Echeverría, F. Mandujano.
